

In order for R Commander to operate on Mac OS X the X11 module must be installed.

For Tiger build 10.3 the X11 installer can be downloaded from the Mac website at <http://www.apple.com/support/downloads/x11formacosx.html>

For Tiger builds 10.4 and 10.5, the OS X Installation DVD is required. In the main directory on the DVD you will find an '**Optional Installs**' file.

Run this and hit '**Continue**'

Hit '**Continue**' again.

Hit '**Agree**'

Hit '**Continue**'

Expand '**Applications**' and check the X11 box.

Hit '**Install**'
